**20.11.2021**

**Pigeon Health examinations**

**Condition and muscle development**

- Excellent on 6 birds examined 5/5
- Mucous membranes 5/5
- Feather Condition 5/5
- External parasites –None
- Candida yeast – None
- Trichomoniasis (Kanker ) - one pigeon tested positive

Blood smears- No pigeon tested positive for avian, malaria.

Feecal Flotation's – No Coccidiosis or Hexamita detected

Throat swabs stained for bacteria - All birds tested negative

The pigeons are in good health and fit to start training on longer distances.

Recommendations treat for trichomoniasis with medicine supplied
